

Sailendra Das Tharu

Software Engineer | React · TypeScript · React Native

Kathmandu, Nepal · sailendradastharu2000@gmail.com · +977 9823092963 · [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of professional experience building web and mobile applications with React, TypeScript, and React Native. Experienced in production UI development, performance optimization, real-time communication, REST and GraphQL API integration, accessibility, E2E testing, monitoring, and payment gateway integration. Strong focus on reusable component architecture, responsive interfaces, maintainability, and delivering polished user experiences.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript
Frontend	React, React Native, Tailwind CSS, Framer Motion
Backend & APIs	Node.js, Express, REST API, GraphQL, Supabase
Payments	eSewa, Khalti
Testing & Monitoring	Cypress, Sentry
Tools & Platforms	Git, Docker, Agora SDK

PROFESSIONAL EXPERIENCE

Frontend Engineer | Ananas Solution

Onsite · Kathmandu | Nov 2024 – Present

Project: Clinical Management System

- Built a doctor dashboard with React and TypeScript featuring interactive charts and real-time patient health statistics, improving clinical data visibility across departments.
- Improved initial page-load performance by implementing code splitting and lazy loading, contributing to better Core Web Vitals.
- Developed real-time video calling and in-app messaging with Agora SDK for doctor-patient communication.
- Integrated Sentry for production error tracking and crash reporting to improve issue visibility and resolution.
- Implemented smooth UI animations and transitions with Framer Motion while maintaining responsive interfaces.
- Built and maintained React Native features, resolving UI/UX issues and improving application stability across iOS and Android.
- Developed reusable TypeScript-based components and patterns to improve maintainability and reduce duplication.

Software Engineer | Varosa Technology

Onsite · Kathmandu | Jun 2023 – Oct 2024

Project: Calilio — SaaS Communication Platform

- Built responsive application pages from the ground up with consistent usability across screen sizes and devices.
- Implemented internationalization (i18n) support to enable a multilingual user experience.
- Integrated REST and GraphQL APIs with robust error handling, loading states, and optimized data-fetching patterns.
- Developed reusable React components and shared UI patterns to improve development velocity and consistency.
- Implemented Cypress E2E test coverage to improve feature reliability and reduce regression issues.
- Applied code splitting, lazy loading, and HTTP caching strategies to improve performance and reduce bundle size.

Project: Shramsansar — Job Portal

- Built responsive job listing and search experiences with filtering across desktop and mobile devices.
- Developed authentication flows including login, registration, and profile management.
- Built an admin dashboard with role-based views for managing job postings, user activity, and platform content.
- Created reusable UI components and consistent design patterns to improve development speed and visual consistency.

PERSONAL PROJECTS

Full-Stack Applications: Built personal applications using Supabase for authentication, database, and real-time backend services.

Payment Integration: Integrated eSewa and Khalti payment gateways to implement online transaction and payment flows.

EDUCATION

Bachelor of Computer Application — Desh Bhagat University | Graduated 2022
